Important events to report: Launch of the HOMELAND BETA social network

Chromosome Dynamics SA announces to investors regarding:

Chromosome Dynamics SA is preparing to launch the beta version of the social networking platform Homeland at the end of August 2023.

Bucharest, August 21, 2023

Chromosome Dynamics (stock symbol **CHRD**), an agri-tech company listed on the AeRO market of the Bucharest Stock Exchange, is getting ready to launch the closed-system (with a maximum of 10,000 users) of its most extensive project – **Homeland**, by the end of August 2023. The social and social responsibility network aims to promote real values, culture, and a balanced lifestyle, aiming for a significant positive impact on users' access to quality content.

"Homeland will be the first social and social responsibility network, dedicated to both supporters of environmental conservation and protection and users who want to have a pleasant and productive experience in the online social environment. Based on this premise, we want Homeland to represent a positive and safe virtual space for all users, allowing them to benefit from all the basic functionalities present in classic social networks, tailored content to their own interests, without 'junk content,' and to enjoy the monetization opportunities that the platform provides", says Ionel Mugurel Gabriel, founder, and CEO of Chromosome Dynamics.

Version 1.0 of Homeland will offer users the chance to obtain information about accounts that have accessed their profile by subscribing to the Homeland Pro version, as well as the opportunity to verify the authenticity of their account followers by acquiring the Verified Account badge for a fee.

The Homeland social network **supports content creators through the paid communities module**, considered groups open to all users, with the possibility of accessing selected content through a monthly subscription.

"The communities created within Homeland are groups formed by content creators for other users with common interests within the platform. The Beta version, for testing, offers users the possibility to create or join a free community, with the implementation of the concept of 'paid communities' in Homeland 1.0, where content creators will be able to monetize premium published content. Of course, our goal with Homeland was to create this safe virtual space without constraints, providing not only chat tools, media posts, and articles in a main feed but also content of interest to the user while offering new development and monetization opportunities for content creators", adds Mugurel Ionel.

You can find out more **about the Homeland social network** [here](#).
